

# Cabinet & Drawer Access Control

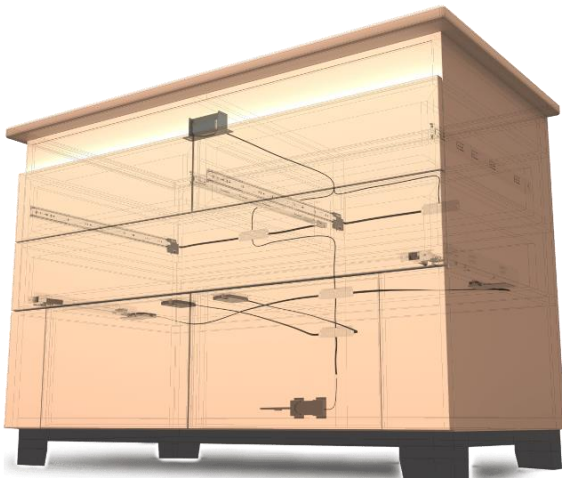

## Asset Lockers

- Great for Laptops, Tablets and other Mobile Devices
- Instant notifications can be sent if a device is not returned by a designated time
- PIN code, access badge and biometric authentication options
- Authenticated users can easily check out and return items in seconds
- RFID tagging option identifies when each asset has been accessed, and by which user

## Intelligent Key Cabinets

- Ensure keys are available 24/7
- Restrict key access to authorized users only
- Instantly know who accessed a key, and when
- Identify keys that have not been returned
- Determine frequency of use of a particular key and for how long
- Produce detailed audit reports and usage information
- Receive notifications via email or SMS text
- Centrally manage systems across multiple remote sites

## Cabinet-Level Access Control

*Cabinet-level access control system designed for cabinet doors, drawers, and more. Using a flexible design of low-profile, modular components, you can install into your custom cabinetry or retrofit it into your existing fixtures.*
